Prevent avoidable disease, **Protect** health, **Promote** wellbeing resilience

Public Health
England

So are we ready to change?

Prevent avoidable disease, **Protect** health, **Promote** wellbeing resilience

**“Future jobs will have professions
that bridge technology, but it will
be technology that is the primary
job generator, not the profession!”**

- - Futurist Thomas Frey

Prevent avoidable disease, **Protect** health, **Promote** wellbeing resilience

One vision of the future:

“The paradox of the future health system is that we will have much more primary care, and primary care will be more important than ever, but it will be supplied predominantly by patients and non-physicians, with back up from specialized primary care providers who are master diagnosticians and clinical decision makers, powered by health information and organizational supports”

David Blumenthal, Medical Professionalism in the New Information Age
