Dr Tarek Radwan | GP Founder & Director
MBBS (Hons) DRCOG MRCPCH MRCGP (Distinction) PGCertMedEd
We are AT Medics | Learning | Tech

AT Medics, AT Learning and AT Tech are transforming the NHS through our provision of primary care services, national training and development programmes and health technology innovation.

Our dedicated training organisation, enabling the development, delivery and scaling of training programmes that have been developed by GPs for all grades of General Practice staff.

AT Learning is an NHS England partner in delivering national training programmes and has delivered to services with a combined patient population of 3.5 million, in addition to our London Deanery accredited Post and Undergraduate medical training to 100s of Doctors annually.

partnered with

supported by

Largest provider of core Primary Care services to the NHS in London. We are a GP-led organisation, with quality improvement, training and innovation at the heart of what we do.

We develop systems and process that enable efficient delivery of NHS services.

Our dedicated health-tech organisation, developing and delivering proprietary analytics, business intelligence and applications to enable deep insight to population health, health economics, medicines optimization, as well as local and national key performance indicators.

Our solutions have been adopted by over 800 NHS GP Practices across the UK. Our dedicated development and customer support teams enable us to provide rapid and agile response to demands.
Our approach to Quality Improvement

1. Understanding current practice
   - Identifying and mapping current processes

2. Co-design new working model
   - Face-to-face workshops to develop a localised solution

3. Training
   - Face-to-face expert training plus e-learning to ensure proficiency, sustainability and succession planning

4. Implementation
   - Ensuring sustained improvement and change, step by step

5. Audit
   - Measuring effectiveness & accuracy of the new process or intervention

Effective PDSA quality improvement process, enabling sustained change process.
The core issues in GP

- Patient Access
- Clinical Workload
- Inconsistent Signposting
- Task Organisation
- Disparate Data
Our Digital Journey

Gradually Developed Practice Portfolio
Developed agile, adaptable systems & processes

Quick wins for QI culture
Workflow Optimisation

Digitizing the patient experience
Requires change process & navigation

The Digital Practice
Patient behaviour mapped websites & online consultation app

Population Health Management
Evaluation and decision support for our digital interventions

Practice Task Management
Helping to develop further efficiency, compliance and visibility
Our ecosystem of digital enablers: tried and tested at-scale in UK General Practice

Our range of products and innovations are developed with a deep knowledge of Primary Care and have been designed to measurably improve performance and resilience.

Ecosystem underpinned by a platform approach. Integration + Adaptation + Scalability + Value Chain
Workflow Optimisation

Delivered to:

- 800 GP Practices
- 3 million+ Patient population
- 30 CCGs

Nationally achievements:

- 60%↓ Average reduction in GP admin nationally
- 1000hrs GP time released
- 3000+ GP staff trained
